Fund aim and objectives

The investment objective is to provide capital growth and to generate positive Environmental, Social and/or Governance (ESG) momentum, over the long term (in excess of 5 years). The investment manager will primarily invest the fund's assets in the shares of companies listed and domiciled in Europe, maintaining a concentrated portfolio of approximately 40-50 holdings. The investment manager seeks to invest in undervalued companies with positive operational momentum. ESG factors will also be incorporated in the analysis by adjusting standard financial metrics to reflect the impact of selected ESG factors.

Fund Commentary

Whilst the exact outcome of the Iranian conflict is opaque, there appear to be some clearer geopolitical shifts taking shape. China could be weakened by recent developments. Assuming the US now controls the Strait of Hormuz, this with Venezuela gives them effective control of 80% of China's oil imports. China threatens the flow of rare earths; the US threatens the flow of oil.

Many investors want to fade any rally in oil, given the glut that is on the water, but we are not doing so in the portfolio. Oil equities are cheap with strong balance sheets and remain an important counterweight to geopolitical volatility.

We continue to view the ongoing pressures in private credit and private equity as a significant risk for public markets in 2026. The disruption risk from AI and the confusion about valuations seems to be an accelerant to a crisis that was already likely. Europe is significantly less exposed, both in public and private markets.

We continue to seek companies with asymmetric risk profiles, where bad news is already discounted and where there is a high probability of upside surprises. Balance sheet strength remains a key focus, with a preference for companies returning capital quickly in the form of buybacks and dividends.

Given broad index valuations, we believe investors should be prepared for downside risks in 2026, but Europe has some positive catalysts. Beyond the middle eastern conflict Europe could see lower electricity prices, 2026 may see a possible end to the war in Ukraine, and German fiscal expansion and some de-regulatory efforts for certain sectors could provide support. The Lightman European Equities Fund has an estimated dividend yield of 3.49% in 2026 and 3.79% in 2027, with a median PE ratio of 15.43 in 2026 and 13.95 in 2027.

Sector breakdown		Top 10 countries		Top 10 holdings	
Consumer Staples	15.52%	Germany	16.12%	Roche	5.06%

Past performance is not an indicator of future performance. Tax treatment depends on the individuals' circumstances and may be subject to change in the future. All data as at 28/02/26 in EUR; fund prices from Northern Trust, MSCI Europe from MSCI. For periods covering part of a calendar year, performance has not been annualised: *2020 performance is from fund launch on 14/09/2020 to year end.²

What are the risks specific to this fund?

- The value of investments and the income derived from them may fall as well as rise and shareholders may not recoup the original amount they invest in the Fund.
- Funds investing in overseas securities are exposed to currency risk. Exchange rate movements may cause the EUR value of investments to increase or decrease.
- The Fund may suffer a reduction in value due to dealing costs incurred when buying and selling investments and management fee charges applied to the fund. Net yields may be lower than gross yields.

¹ Note: 2025 yields are estimated net yields based the period Jan - Dec 2025. Net yield is after expenses and taxes. Yield % is calculated using ex-dividend unit price as on 31/12/2025. 2026/27 gross yields are approximate and calculated based on actual stock weightings and consensus dividend yields for 2025/26 as available on Bloomberg.
² Performance quoted does not consider applicable taxes on the investor. Performance calculated using EUR denominated unit prices or index values as at beginning and end of periods. Fund performance is net of fees with net income reinvested. MSCI Europe values used are net return EUR index.
