The Fund is managed by Link Fund Solutions (Luxembourg) S.A. ("the "Management Company")

Objectives and Investment Policy

The Sub-Fund objective is to provide long-term (in excess of 5 years) capital growth. In order to achieve this objective, the Sub-Fund will invest primarily in the shares of companies that are domiciled in, based in or carry out the larger part of their business activities in Europe and are listed on a Regulated Market. The Sub-Fund integrates selected social and/or environmental factors in its investment process to achieve responsible investment characteristics, such as climate change mitigation, over the long term. The Sub-Fund may invest a minimum of 50% of its net assets in portfolio companies that promote such characteristics. The Sub-Fund may also invest, directly or indirectly, in non-European companies that are listed on a Regulated Market. Indirect exposure will be via Eligible UCIs.

The Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS and/or other Eligible UCIs. On an ancillary basis, the Sub-Fund may also hold liquidities such as, among others, cash deposits, money market funds and Money Market Instruments.

The Sub-Fund may use financial derivative instruments for hedging. The financial derivative instruments the Sub-Fund is permitted to use are limited to futures and options listed on a Regulated Market.

The Sub-Fund will have a portfolio of approximately 40-50 holdings. The investment manager seeks to invest in companies that in their opinion

are undervalued but have strong potential to increase in value through margin expansion and/or earnings growth.

The Sub-Fund is a medium/high risk vehicle aiming to provide long-term capital growth. It may be suitable for investors who are seeking long-term growth potential through investment in equities.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Sub-Fund is ranked in risk and reward category 6 as it can invest in equity securities that can face variations up or down and that can generate gains or losses.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Sub-Fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time. Investors may not get back the amount originally invested and may lose money. There is no assurance that the objective of the Sub-Fund will be achieved.

The Sub-Fund is also subject to risks which are not included in the calculation of the risk-reward indicator associated with the following risks:

Liquidity Risk: At times, some shares may trade infrequently which means it may be more difficult for the fund to buy and sell them. Prices may also be subject to short term swings.

Concentration Risk: The Sub-Fund may hold a large weighting in a small number of investments and may therefore be subject to larger than normal swings in its value.

For full details of the Sub-Fund's risks, please see the Prospectus and Sub-Fund supplement which may be obtained from the address in 'Practical Information' overleaf.
